PREFACE

This is the second edition of a Directory of Seed Companies and Producers in Ghana published by the National Seed Trade Association of Ghana (NASTAG) and funded under the United States Agency for International Development's (USAID) Ghana Inclusive Agricultural Transformation Programme through the Alliance for a Green Revolution in Africa (AGRA). This directory was developed to address the prevalent seed information and trade linkage gaps in Ghana. It provides reliable information to seed producers, private seed companies, and Government institutions, aiming to promote seed companies' services and products. Most importantly, the directory provides a channel for seed suppliers to build linkages and ensure agro-input dealers can stock quality-improved certified seeds.

Research has shown that smallholder farmers have limited access to certified improved seeds. The main challenge is limited access to information concerning seed companies and producers among value chain actors. A Database of seed companies and producers exist at various district and regional levels, but they are not widely circulated nor frequently updated. The information in this directory was acquired through a survey in 2021. Data from over 291 seed companies and producers operating throughout Ghana were collected. The data gathered will further enhance the flow of information among various actors within the seed value chain and increase access to quality seeds by underserved farmers. We believe that using quality seeds – combined with planning and good agronomic practices – should lead to an increase in food production and an improvement in the livelihood of smallholder farmers.

The publication of the directory contributes to the overall goal of NASTAG to support the competitiveness of Ghana's seed value chain. This is done by strengthening the business and technical capacity of its members and other seed producers, promoting effective collaboration among and between actors, advocating regulations and standardization, and providing general seed information to all stakeholders.

We want to thank everyone for their enormous contributions to making the publication of this directory a success, particularly the financial and technical support of USAID and AGRA and all the seed companies and producers who took the time to respond to our questionnaires. We thank the National Seed Council, the Plant Protection and Regulatory Services Directorate (PPRSD), and the Directorate of Crop Services of the Ministry of Food and Agriculture for allowing us to publish the Directory of Seed Companies and Producers in Ghana.

Augusta N. Clotley | Chief Executive Officer

...Seed for Life

MESSAGE FROM NASTAG

The National Seed Trade Association of Ghana (NASTAG) is an amalgamation of all seed value chain actors in the seed industry, which was established from a resolution passed by stakeholders at a workshop in November 2015, sponsored by the USAID Feed the Future Ghana Agriculture Policy Support Project (APSP). NASTAG was officially registered in February 2016 as a not-for-profit membership-based association limited by guarantee.

The Association is dedicated to supporting the competitiveness of the seed value chain in Ghana through the business and technical capacity development of its members, promoting effective collaboration among and between industry players, and serving as the mouthpiece on advocacy issues relating to seed and the provision of general seed information. It has positioned itself to support industry players to develop their niche to the fullest potential for individual and collective benefits, ultimately contributing to enhancing agricultural production that will improve farmers' livelihoods and overall agriculture in Ghana.

NASTAG is linked to regional bodies such as ASIWA, CORAF/WASP, and AFSTA. As the leading national seed industry umbrella association, NASTAG fully recognizes the importance of seed industry information generation for the promotion of Seeds as the engine of growth for the agriculture sector in Ghana. Invariably, all seed value chain actors and stakeholders require adequate information to make smart business decisions, particularly on seed production, marketing, policy, and regulatory environment. Consequently, the publication of the revised Seed Directory is a step in the right direction for NASTAG to generate relevant information on the seed sector for all industry stakeholders. This is consistent with the Association's strategic objective of becoming the information hub on the seed sector in Ghana.

NASTAG is convinced that the Seed Companies and Producers Directory is a major instrument to ensure credibility among seed enterprises, improvement in quality seed production and marketing, and promotion of effective quality assurance and certification through self-regulation among members.

Importantly, this Directory would help us know who is doing what and in what area among seed enterprises while facilitating information flow for stronger seed value chain business linkages and networking. To us in NASTAG, this Directory is the product of collective effort in a cooperative enterprise among critical actors with a great sense of purpose in fulfilling a need of the seed industry.

Accordingly, NASTAG applauds the USAID Ghana Inclusive Agricultural Transformation (GIAT) Programme through the Implementing Partner, the Alliance for Green Revolution in Africa (AGRA), for funding the Seed Directory. We very much appreciate the technical expertise of the Consultant, Mrs. Lydia Nikoi, her team of field assistants, and the NASTAG Secretariat staff for the excellent design and implementation of a data-gathering instrument/process, culminating in this rich resource of a Seed Directory. We also feel obliged to mention the unflinching support from our public sector partners, such as the PPRSD/GSID, MoFA/ DCS, and the National Seed Council. Also, we gratefully acknowledge the invaluable contributions of our private seed companies/members and other seed enterprises who availed themselves to provide the data/information on seed production and business.

Finally, we hope our seed sector information system will be strengthened with the cooperation and enthusiasm we experienced in producing this Directory. With the realization of the enormous benefits that will follow, we expect to see a more strengthened, resolute, and supportive industry player action in our bid to further develop and update this Directory annually for the collective benefit of all stakeholders.

Mr. Kwabena Adu-Gyamfi | President
National Seed Trade Association of Ghana **(NASTAG)**

MESSAGE FROM NATIONAL SEED COUNCIL

On the occasion of launching the second edition of NASTAG's Directory of Seed Companies and Producers in Ghana, the National Seed Council sends felicitations and congratulations to NASTAG and all its stakeholders. The NSC compliments NASTAG for the able manner it has deployed the Directory, building it up as a one-stop compendium of indispensable seed industry data, statistics, and information for all stakeholders along the seed value chain.

The National Seed Council is currently engaged in a push towards ensuring that seed stakeholders are adequately endowed with skills and knowledge relevant to their mandates along the seed value chain to achieve order, cohesion, and collaboration that will ensure the collective delivery of the end product - quality, affordable and accessible, adaptable and preferred seeds – into the hands of our hard-working farmers. And NASTAG is an able and willing partner in that endeavor. All stakeholders will agree that lack of adequate data, statistics, and information has been a bane in seed industry planning and implementation, requiring the need to systematically build up the national seed knowledge platform and, even beyond, cooperate with sister countries to address also the regional and continental concerns relating to that shortfall.

The National Seed Council is confident that by this Directory, NASTAG will take leadership in ensuring that Ghana launches a renewed and strengthened effort to get the ball rolling toward playing our part. May all who need the Directory find abundant pleasure and usefulness in deploying it and, by it, reap abundantly from it to benefit their endeavor, the overall seed industry of Ghana, and our beloved Motherland. God bless us all.

Mr. Josiah Wobil | Chairman
National Seed Council

MESSAGE FROM THE PPRSD

The Plant Protection and Regulatory Services Directorate (PPRSD) is the National Institution under the Ministry of Food and Agriculture (MoFA) with the mandate and capacity to organize, implement and coordinate the plant protection services needed for the country in support of sustainable growth and development of Agriculture. The vision of PPRSD is to render efficient, environmentally safe, and economically sustainable plant protection and regulatory services that will meet the clientele's requirements and thus contribute to increased food and raw material production. The mission of PPRSD is to provide services to safeguard the health and quality of plants from losses by pests and diseases. The Ghana Seed Inspection Division (GSID) is a Division of the PPRSD mandated by the Plants and Fertilizer Act, 2010 (Act 803) to

- i. Register seed growers and dealers for the production and marketing of seeds;
- ii. Inspect seed fields, processing, and storage facilities;
- iii. Sample, test, and evaluate seeds produced by seed growers;
- iv. Sample and test imported seeds;
- v. Certify seed produced by growers;
- vi. Conduct pre- and post-control verifications;
- vii. Monitor sale outlets to ensure the suitability of storage premises and seed viability and
- viii. Enforce seed laws and regulations.

The GSID operates a National Seed Testing Laboratory at Pokuase, near Accra, and has regional satellite laboratories in six locations in the country. From the breeder seed stage up to the sale of certified seeds, seed industry quality standards are enforced through regulations by the GSID.

As the regulator responsible for producing quality seeds in Ghana, the GSID of PPRSD recognizes the value of information on its clientele, the seed companies, and producers. Although the PPRSD has been responsible for profiling all seed companies and producers in Ghana, the directory needs to be updated to list all seed enterprises and their locations. To the understanding of the PPRSD, this updated Seed directory will help the inspection unit of the GSID to provide the needed services to the seed industry players/stakeholders. As a partner to the National Seed Trade Association (NASTAG), the PPRSD is optimistic that this noble initiative will continue to strengthen the collaboration between the two institutions in our effort to develop the seed sector to enable it to meet the highest international standards possible. We hope NASTAG will update the information regularly and bring the new seed companies and producers on board to ensure that the sector provides the quality of seeds that farmers deserve. Consequently, PPRSD is grateful to all the partners of NASTAG for bringing this very informative Seed Directory into reality. We are hopeful that users will find it useful resource material.

Mr. Eric Bentril Quaye | Director

Plant Protection and Regulatory Services Directorate **(PPRSD)**
Ministry of Food and Agriculture, Accra.

MESSAGE FROM THE DIRECTORATE OF CROP SERVICES

The Directorate of Crop Services of the Ministry of Food and Agriculture wishes to express profound gratitude to the National Seed Trade Association of Ghana (NASTAG) for its unflinching support for developing the Ghana Seed Sector. It is important to note that the Ghana Seed Sector has made remarkable progress within the past few years, with significant improvement in the use of certified seeds (about 30%), and this momentum must be increased further. This would not have been possible without the tremendous support of NASTAG and its partners. As a key agricultural input, seeds play a fundamental role in meeting the triple challenge of improving food security and nutrition, supporting the livelihoods of farmers and rural communities, and contributing to sustainable resource use and climate change adaptation and mitigation.

It is worth noting that the first edition of the National Directory of Seed Companies and Producers developed by your Association has served us well and made an impact regarding the information on various registered seed companies and the crop species they produce. There is a need to regularly update the data on the National Directory of Seed Companies and Producers (both public and private) to serve the needs of both the national and international seed sector stakeholders. For instance, specific information on all registered certified seed producers, their locations, contact, and the type/class of seed produced is paramount. This will ultimately improve seed businesses in the country through enhanced linkages and increased seed marketing. Once again, the Directorate would like to congratulate the National Seed Trade Association for taking this initiative further to enhance the development of the Ghana Seed Sector.

Mr. Seth Osei-Akoto | Director

Directorate of Crop Services, Ministry of Food & Agriculture

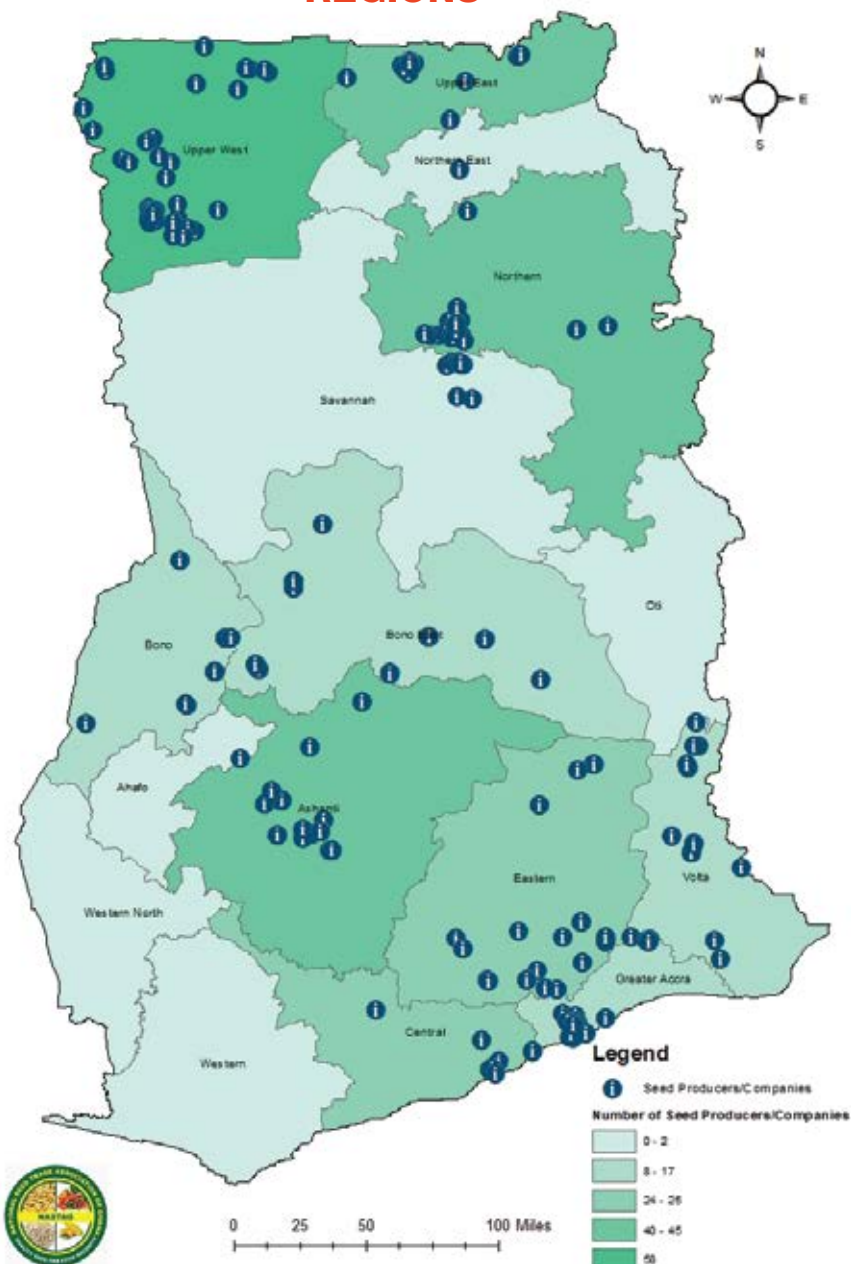

Agriculture remains the key to economic growth and food security in Ghana. Despite the importance of agriculture in transforming livelihoods, the sector is still characterized by low yields and low adoption of improved technologies, such as quality-certified seeds, by farmers. Quality seeds are a prerequisite to productive and profitable agriculture and constitute a major pathway for achieving national food security goals. Over the past few years, stakeholders in Ghana's Seed Industry have acknowledged major setbacks in the development of the sector with peculiar constraints that inevitably affect its competitiveness. Considering this, several interventions resulted in Ghana's seed system experiencing magnificent improvement due to considerable investments in the sector by donor partners. Notable among them were AGRA-PASS, USAID / FtF (SSTP, APSP, ATT) projects, which supported breeding programs, Early Generation Seed (EGS) studies, private sector production, and promotion of foundation and certified seeds. Other major developments in the seed sector include the enactment of the Plants and Fertilizer Act, 2010 (Act 803), the development of regulations for implementing the law, the activities of domestic and foreign seed companies, the establishment of the National Seed Council and development of the National Seed Plan for the operationalization of the seed policy. With funding from USAID Ghana under the Partnership for Inclusive Agricultural Transformation in Africa (PIATA), AGRA is supporting key stakeholders in the seed value chain, including the National Seed Trade Association of Ghana (NASTAG), through several consortiums to implement a seed sector strengthening framework to reinforce the seed system and enhance quality seed delivery. NASTAG's role includes the coordination of private-sector seed and agro-input suppliers and advocacy in strengthening the role of the private sector in the industry.

The profiling and publication of a directory of seed and agro-input suppliers is a critical activity that is necessary to boost the visibility of key private sector actors, increase brand awareness and reach and enhance offers for seed and agro-input technologies for the benefit of farmers.

This directory will also support policymakers to have up-to-date information and data on seed production and distribution to guide policy and strategic decisions for the benefit of farmers. AGRA is happy to have supported this activity, and we are hopeful it will prove very relevant to key stakeholders in Ghana and beyond. We sincerely want to thank all partners and stakeholders involved in making this publication a reality.

Juliette Lampoh - Agroh | Country Manager, AGRA

SEED PRODUCERS / COMPANIES REGIONS

MEMBERSHIP IN NASTAG

Why you should become a member

- Ø We are a credible organization representing seed sector stakeholders where all members are recognized as players with the hallmark of quality.
- Ø We facilitate conducive legal Environment for Business and thus form a strong force to lobby and to promote policies and legislation that protect members investments.
- Ø We advocate on your behalf on specific concerns and challenges to be addressed by government and its Ministries, Departments and Agencies, and all other organizations.
- Ø You have access to global information sharing, Publications, and skills through capacity development programmes to ensure international and national standards.
- Ø You have the opportunity to share experience and techniques to improve your business environment.
- Ø We offer a platform for you to network and advertise products, strike business deals, trade high quality seeds, and expand your market across Ghana and beyond
- Ø We ensure members adhere to high standards for quality giving you priority in all engagements with other stakeholders including programmes, projects, farmers groups etc.
- Ø We project the image of members at international fora / level where applicable.
- Ø We assist you understand your market and scope through effective data management system.
- Ø We keep you informed on local and international trade opportunities and provide all the needed support to facilitate your trade internationally across the borders when needed.
- Ø Market access issues or limitations concerning export and import of seed.

AGRA's New Branding

The name is no longer an acronym. It is simply a name that is easy to pronounce and remember. AGRA is similar to agri or agriculture but can mean so much more. The new logo has a strong visual map of Africa with sunshine and rolling fertile fields embedded. The circle shows that Africa is not isolated but centrally located on the globe.

The new AGRA tagline; “Sustainably Growing Africa’s Food Systems”, speaks in a literal way to how AGRA sees itself positioned in the marketplace. AGRA is a defender of the earth and its natural resources and the people who depend on them; climate change is real. AGRA knows that unmitigated exploitation of resources will inevitably lead to environmental collapse and hunger. AGRA knows that this scenario can be contained if smallholder farmers are equipped with knowledge and resources that enable them to grow the food Africa needs in a sustainable manner. AGRA will help provide that knowledge and the resources.

White Maize Hybrid

SC719

Maturity: 110-120 days

Potential Yield: 10-12 MT/HA

Special attributes: High yielding & tolerant to lodging

*Available on PFJ

SC649

Maturity: 100-115 days

Potential Yield: 8-10 MT/HA

Special attributes: Tolerant to drought & wide adaptability

*Available on PFJ

SC419

Maturity: 85-90 days

Potential Yield: 8MT/HA

Special attributes: Tolerant to Striga hermonthica

Yellow Maize Hybrid

LG336

Maturity: 110-115 days

Potential Yield: 8-10 MT/HA

Special attributes: Double cobbing trait.

LG501

Maturity: 105-110 days

Potential Yield: 8-10 MT/HA

Special attributes: High yielding, large ear and large grain quantity

LG345

Maturity: 100 days

Potential Yield: 8MT/HA

Special attributes: Fast drying
